- Course evaluation, posttest, learning assessment, to be completed online with a passing score of 70% within 1 week is required to receive your certificate of completion.

DESCRIPTION

This practical workshop gives therapists tools they can use with clients of all ages to engage strengths and manage sensitivities in our increasingly demanding world. From sensitivities to sensory experiences such as noise and overwhelming multisensory input to emotional sensitivities that make daily life stressful and interfere with getting a good night's sleep, this workshop is filled with proactive strategies and activities that help kids and families 24/7.

LEARNING OBJECTIVES

At the end of this seminar the participant will be able to:

1. Define the differences between strength based vs. deficit-based models
2. Pinpoint specific sensory processing challenges
3. Identify practical strategies for sensitivity to noise, touch, movement, visuals, taste and smell
4. Develop powerful, easy-to-implement school-based solutions
5. Demonstrate fun, targeted therapeutic activities that build skills including visual-vestibular integration, fine and graphomotor, and executive function
6. Describe a framework for problem-solving self-care challenges
7. Articulate solutions to parents on how to foster more restful sleep for their children and entire family
